The image shows a screenshot of the Visual Studio Code editor interface. The title bar indicates the file is 'cambiacolor.php - Dias de vida - Visual Studio Code'. The Explorer sidebar on the left shows the project structure with files: dias.php, dias.html, css.css, and cambiacolor.php. The main editor area displays the content of 'cambiacolor.php', which is a PHP file containing JavaScript code. The code defines three functions: 'rojo' (red), 'azul' (blue), and 'verde' (green), each using 'alert' and 'document.getElementById' to change the background color of an element with the ID 'samu'. The code is as follows:

```
17     alert("outchh soy rojo");
18     document.getElementById("samu").style.backgroundColor="red";
19 }
20
21 function rojo(){
22     alert("outchh soy rojo");
23     document.getElementById("samu").style.backgroundColor="red";
24 }
25
26 function azul(){
27     alert("outchh soy azul");
28     document.getElementById("samu").style.backgroundColor="blue";
29 }
30
31 function verde(){
32     alert("outchh soy verde");
33     document.getElementById("samu").style.backgroundColor="green";
34 }
35
36 </script>
37 </body>
38 </html>
```

The status bar at the bottom shows 'Ln 32, Col 8', 'Spaces: 4', 'UTF-8', 'CRLF', 'PHP', and the date '07:14 a.m. 26/10/2022'.
